Special Issue

Insights in Hematology and Hematological Malignancies in Children, Adolescents, and Young Adults

Message from the Guest Editor

Hematologic diseases and hematological malignancies remain among the most important causes of morbidity and mortality in children and adolescents worldwide. Leukemia is the most common childhood cancer and, together with lymphoma, it accounts for roughly 40% of all pediatric cancer diagnoses. Over the past decades, risk-adapted chemotherapy, improved supportive care and hematopoietic stem cell transplantation have raised the cure rates for acute lymphoblastic leukemia to above 90% in high-income countries. However, substantial challenges remain: outcomes for relapsed or refractory disease, acute myeloid leukemia and high-risk subgroups are still unsatisfactory; survivors face long-term treatment-related toxicities and marked disparities in access to diagnosis and therapy persist across regions and health systems. This Special Issue aims to present and disseminate the most recent clinical advances in pediatric hematology and hematological malignancies. We welcome original research articles and reviews addressing diagnosis, treatment, supportive care and long-term outcomes in children and adolescents with benign and malignant hematologic conditions.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France
Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
